Sustainability Policy

Digital Technologies Geelong (DTG) is committed to minimising its impact on the environment through the principles of sustainability.

DTG will achieve this through the development, implementation and continuous improvement of systems and practices to optimise the use of resources and to minimise waste.

Digital Technologies Geelong will manage this commitment by:

• identifying community and statutory requirements and expectations

• establishing, monitoring and reviewing objectives

• auditing systems and performance

The Resource Smart Strategy recognises Digital Technologies Geelong's role in promoting sustainable practices to its staff, students and broader community. It contains objectives, targets and actions based around 6 key areas of Energy, Waste, Management & Communication, Water, Purchasing and Education.

The Environmental Management Committee is responsible for the provision of advice to DTG on environmental matters and development and review of strategies, policies and plans to achieve agreed objectives.
